Thomas Tube Holder

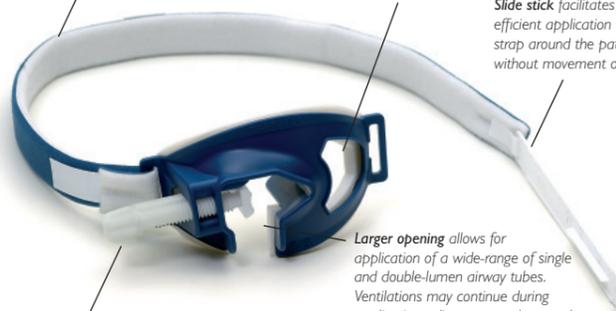

Whether you are securing an ET tube, LMA or other airway tube device, the Thomas Tube Holder is all you need! Designed to secure single and double lumen-airway tubes, the Thomas Tube Holder is fast and simple to apply and provides a reliable hold over tape fastening methods. In fact, the Thomas Tube Holder is ergonomically engineered to meet the needs of healthcare providers and offers a comfortable fit for both adult and pediatric patients.

The unique and enhanced design of the Thomas Tube Holder allows for the safe, effective security of ET Tubes, LMA's, Combitubes®, LTA's and other supraglottic airway tube devices. The Thomas Tube Holder gives the rescuer the confidence needed to secure the patient's airway... because security is always a priority.

Hook and loop padded strap provides security and comfort. Will not stretch or shrink when wet. Color-coded for ease of identification between adult and pediatric Thomas Tube Holder versions.

Larger access opening to allow for ease of suctioning and visual inspection of mouth.

Slide stick facilitates fast, efficient application of the head strap around the patient's neck without movement of the head.

Larger opening allows for application of a wide-range of single and double-lumen airway tubes. Ventilations may continue during application, adjustment and removal of the Thomas Tube Holder.

Quick-set screw system securely holds tubes in place and facilitates fast, easy adjustment or removal of the Thomas Tube Holder.
